

What is Visual Research?

[Billingsgate Fishmarket Project](#)

'Working with Fish from Sea to Table'
by Dawn Lyons
She wanted to record the rhythms of
the fish market using time lapse
photography

What is Audio Research?

[Lend Me Your Ears by Alex Rhys Taylor](#)

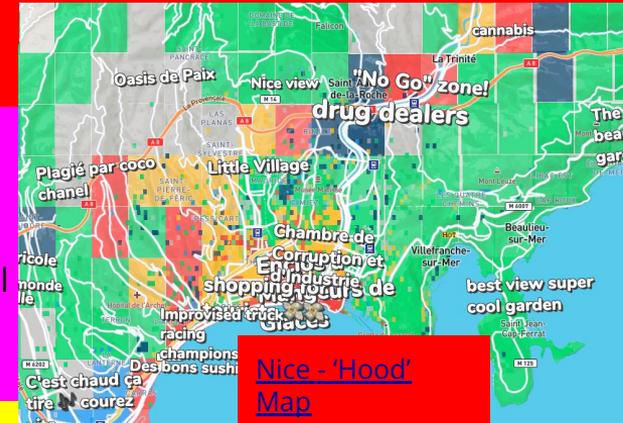

3D sounds of the city. What does it tell you about the place he is walking around?

Research Phase

- Listen to the podcasts on the iDoc site. Is there a story you'd like to share?
- Go on a research walk around a place which is familiar to you? (Go with a friend or let someone know where you are going.)
- Does the place represent safety or danger? Love or hate?

Creation Phase

- Collect visual and audio research from that place. Use your phone to record video, images and/or audio.
- Create a voice memo to go with your images or video.
- What do you want us to know about it?
- Does it remind of a story from your present or your past?
- Upload to the site and share your experiences of the landscape.
